PROFESSIONAL SUMMARY

Final-year B.Tech student specializing in Computer Science (Artificial Intelligence) with a strong foundation and hands-on experience in Java, Spring Boot, JDBC, MySQL, HTML, CSS, and JavaScript. Skilled in developing web-based applications with a good understanding of backend development, REST APIs, and database management. Passionate about software development, problem-solving, and learning modern technologies to build efficient and scalable applications.

EDUCATION

- G.H.Raisoni collage of Engineering and Management Pune.** **2024-2027**
B.Tech in CSE-Artificial Intelligence | CGPA-8.64 (Expected)
- CSMSS Collage of Polytechnic Chh.Sambhajinagar** **2021-2024**
Diploma in Computer Engineering | Percentage – 86.17
- Shri Saraswati Bhuvan High School , Bidkin** **2020-2021**
SSC | Percentage – 86.17

TECHNICAL SKILLS

- Languages:** Java (Core & Advanced), SQL, JavaScript, Python
- Frontend:** HTML, CSS, JavaScript
- Backend:** Java Servlets, JDBC, REST API
- Databases:** MySQL, Database Design, SQL Query Optimization
- Frameworks:** Spring, Spring Boot, Hibernate
- Tools & Version Control:** Git, GitHub, IntelliJ IDEA, VS Code, Postman
- Core Concepts:** Object-Oriented Programming (OOPs), Data Structures & Algorithms, SDLC, Exception Handling, Multithreading Basics

SOFT SKILLS

- Problem-Solving
- Adaptability
- Teamwork / Collaboration
- Communication Skills

TECHNICAL PROJECTS

Vehicle Breakdown Assistance (Backend Developer) | *Java Servlets, JDBC, MySQL*

- Developed backend for mechanic registration and service requests
- Designed MySQL database for storing user and booking data
- Used JDBC for database connectivity
- Handled booking requests and status updates

Student Management System | Java, JDBC, MySQL

- Developed a Student Management System using Java and MySQL.
- Implemented CRUD operations for managing student records.
- Integrated JDBC for database connectivity.
- Used SQL queries and relational database concepts for efficient data management.

Smart Leave Management System | Java, Spring Boot, Spring MVC, REST API, MySQL, Thymeleaf

- Developed a web-based leave management system using Spring Boot and MVC architecture.
- Implemented employee, manager, and admin modules with role-based authentication and leave approval workflow.
- Designed REST APIs for leave application, approval, and status management.
- Integrated MySQL database using Spring Data JPA for efficient data handling.
- Developed responsive frontend pages using Thymeleaf, HTML, CSS, and JavaScript.
